AIP Publishing is a wholly owned not-for-profit subsidiary of the American Institute of Physics (AIP). Our portfolio comprises highly regarded, peer-reviewed journals, including a growing portfolio of Open Access titles, that cover all areas of the physical sciences.

The research published in these titles paves the way for new fields of study, gives rise to new techniques, and provides inspiration to contemporary researchers.

Applied Physics Letters | The Journal of Chemical Physics | Physics Today | Review of Scientific Instruments | Physics of Fluids | Physics of Plasmas | Journal of Applied Physics | AIP Advances

Materials Science - Postdoctoral Researcher | Lawrence Livermore National Laboratory

Fri, 10 Jun 2022 03:20:52 -0400
Livermore, California, We have an opening for a Postdoctoral Researcher to implement innovative experimental characterization and theoretical analysis of features formed during the production and atmospheric aging of actinide materials. You will support a multi-disciplinary team developing new forensics signatures of nuclear materials. This position will be in the Actinides and Lanthanides group of the Materials Science Division. In this role you will Conduct research characterizing nuclear materials to determine microstructure, chemical distribution, and morphology and their dependence on process and aging parameters Participate in understanding the fundamental processes of materials aging using state-of-the-art surface and bulk analysis instrumentation and ...

Laser Physicist- Advanced Photon Technologies | Lawrence Livermore National Laboratory

Fri, 10 Jun 2022 03:20:52 -0400
Livermore, California, We have an opening for an experienced Laser Physicist to independently guide laser technology-related research and development efforts and provide technical direction to interdisciplinary teams that will perform design, analysis, modeling, construction, and testing and commissioning of state-of-the-art high energy, high peak power, and high average power laser systems for DOE missions and applications. These positions are in the Advanced Photon Technologies (APT) group in the High Energy Density and Photon Systems (HED&PS) Program in the National Ignition Facility and Photon Science (NIF&PS) Principal Associate Directorate. This position will be filled at either level based on knowledge and ...

Laser-Materials Interactions - Staff Scientist | Lawrence Livermore National Laboratory

Fri, 10 Jun 2022 03:20:52 -0400
Livermore, California, We have an opening for a Materials Scientist/Engineer/Chemist /Physicist to conduct a full range of moderate to complex research in the areas of materials science, especially in laser-materials interactions. You will actively participate with and be an integral member of an interdisciplinary team responsible for conducting and supporting research in lasers for DOE, NNSA, and DoD national security missions. This position is in the Laser Materials Interaction Science group in the Materials Science Division. In this role you will Conduct moderately complex to complex research in laser-material interactions using materials characterization including time-resolved photoluminescence imaging and photothermal imaging. Contribute ...

Biology - Postdoctoral Researcher | Lawrence Livermore National Laboratory

Fri, 10 Jun 2022 03:20:52 -0400
Livermore, California, NOTE: This is a two-year term appointment with the possibility of extension to a maximum of three years. We are seeking a dedicated and hardworking Postdoctoral Researcher to investigate viral evolution and pathogenesis using in vitro and in vivo assays, deep sequence analysis, and reverse genetics. You will join an interdisciplinary team working at the intersection of virology, immunology, molecular biology, and bioinformatics. This position is in Microbiology and Immunology Group of the Biosciences and Biotechnology Division. In this role you will: Design and conduct in vitro and in vivo experiments in virology, molecular biology, and immunology in ...
